SUMMARY

Software Developer with 2+ years of hands-on experience in React.js, Next.js, Node.js, TypeScript, and Shopify development. Skilled in building scalable web applications, integrating APIs, and leveraging Cursor AI and Claude to accelerate development, improve code quality, and deliver responsive, user-friendly solutions.

WORK EXPERIENCE

Software Developer | Seraphic Infolutions Pvt. Ltd. (Mohali) **June 2025 - Present**

- Developed scalable web applications using Next.js, Node.js, React.js, TypeScript, and REST APIs.
- Built and optimized Shopify Liquid themes, including custom sections, templates, and storefront features.
- Integrated third-party APIs and developed reusable components for scalable frontend applications.
- Improved website performance through lazy loading, code splitting, and image optimization.
- Collaborated with backend and design teams to deliver responsive, SEO-friendly web applications.

Full Stack Developer | DST Technology Pvt. Ltd. (Saharanpur) **Nov 2024 - Apr 2025**

- Developed a trade monitoring software to track real-time options market data and automate trade notifications.
- Integrated Dhan API & Telegram Bot API for live LTP tracking, trade alerts, and stop-loss/target updates.
- Built a role-based dashboard for analysts to post trades and admins to manage permissions and monitor trades.
- Designed a responsive UI with React, Redux, Bootstrap, and a FastAPI (Python) backend using DuckDB & PostgreSQL.

EDUCATION

Master of computer Application - Lovely Professional University **Dec 2025 - Present**
Bachelor of computer Application - Kurushetra University **Aug 2022 - July 2025**
Senior Secondary School - HBSE **Mar 2021 - Mar 2022**
Higher Secondary School - HBSE **Mar 2019 - Mar 2020**

SKILLS & TOOLS

- **Technical Skills:** MERN Stack, Next.js, TypeScript, Redux Toolkit, Tailwind-CSS, RESTful APIs, C++ (OOPS), DBMS (SQL & NoSQL), Shopify Development, Liquid Templating.
- **Tools**: Git, GitHub, Bitbucket, Postman, Cloudflare (Domain & DNS Management), AWS EC2.

RECENTS PROJECTS

Taekwondo Super League (TSL) - Sports League Management Platform | tslind.com

React.js, Next.js, Lovable AI, Node.js, MongoDB, TypeScript, Cloudinary, Railway, Cloudflare DNS

Developed a full-stack sports league management platform with athlete, coach, referee, team manager, sponsor, and auction registrations, dynamic admin dashboard, team and media management, Cloudinary integration, REST APIs, and production deployment using Railway with Cloudflare DNS.

Kenzari - Jewellery E-Commerce

Next.js, Node.js, TypeScript, Tailwind CSS, REST APIs, Stripe

Developed a UK-based jewellery e-commerce platform using Next.js and Node.js, featuring product catalogues, dynamic filtering by category, price, and material, and a role-based dashboard for Super Admins, Retailers, and Affiliates to manage products, orders, inventory, and affiliate operations, with real-time analytics.

Skor - Safe Rental Platform

React.js, JavaScript, REST APIs, Responsive Design, Feature Walkthroughs

Bilingual (ES/EN) rental transparency platform connecting tenants and landlords. Developed tenant and landlord portals with authentication, interactive feature walkthroughs, and real-time dashboards.

EquiCare – Horse Management Platform

Next.js, TypeScript, Tailwind CSS, REST APIs

Horse management platform for horse owners and stable managers. Developed stable management, horse profiles, feed tracking, a custom calendar-based event management system, and responsive dashboards to streamline daily operations.

Liquid of Life – Water Filtration E-commerce Store | liquidoflife.net

Shopify, Liquid, Theme Customization

Developed a complete Shopify e-commerce store by building custom themes, reusable Liquid sections, dynamic product templates, collection pages, and cart enhancements, delivering a responsive and optimized shopping experience.
